Northhome Comfort Windows

T.&T. D., Saskatoon Windows installed May 12 & 13, 2010

"We chose Northhome Comfort Windows as I had called and spoke to many people on your list and our friends who had these windows installed and heard POSITIVE feedback. The first thing we noticed – our house is cooler and the windows open and close very easy and are attractive to look at."

Comments after service visit on November 4, 2014: "Our concerns were addressed quickly and we were happy with the timeline when the service technicians came. The service technicians were very professional, knew exactly what to do, fixed the problem and also did some extras that were not on the work order. They did a great job resolving our window issues. Continue with the great service & friendliness."

Comments Five Years later: "It was hard at first to justify spending that much money when our windows were only about 20 years old. But technology has changed, so all in all, yes it was a good investment. After 5 years of having our windows installed we have been happy with Northhome Comfort Windows and would use them again. The service has always been very good. So glad our friends recommended them."

Comments After service on July 16, 2015: "Any issues that we have had were completely addressed and looked after. We have always been very happy with the service, windows, friendly staff and communication from the office to the service technicians. If we were ever to get more windows this is the company I would go to given their excellent service and product."
