Northhome Comfort Windows

B.&K. G., Saskatoon Windows installed October 2 & 3, 2013

"The reason we purchased Northhome windows was because we liked the product you suppl and the method of installation. The phone conversations with the office staff were friendly and the information supplied was clear & informative. The installation crew was great! The arrived on time, worked together as a team, did not waste time, were willing to answer questions and were very friendly. The overall experience with NORTHHOME has been a positive one."

Comments 1 year later: "Best thing about our windows is that there is no ice, frost or moisture buildup on the inside of the windows during the cold winter, & also that I don't have to paint the exterior brickmold. I have noticed that less outside noise comes through the windows & that the furnace & A/C do not run as frequently as before. This means a cost savings to us on our energy bills. I could have purchased less expensive windows but both my wife & I agreed that the MADE FOR SASK WEATHER features were worth the extra dollars. We appreciated the helpfulness, knowledge re windows & willingness to offer suggestions re some changes that Nelson & Cheryl brought to the table, & never any pressure. The installers were efficient & friendly & willing to answer all my questions. They completed the job in a timely fashion. Our window have not caused us any problems since installation of 1 year ago."
