Northhome Comfort Windows

B.&N. F., Theodore Windows installed October 22, 2009

“The best thing about our new windows is that they look great and feel warm! It is definitely exciting to have a local business that is not only so thorough, but who treats their customers with respect and develops such a positive relationship. Thank You!

Comments One Year Later: “We had an RTM home built last year and Northhome windows installed in a walkout basement. We can tell the difference between the new windows upstairs in the RTM and the Northhome Comfort Windows downstairs. The Northhome windows are much warmer in the winter, no condensation on the inside like the upstairs windows. I will contact you to install windows again the future ... perhaps near future.”
