Northhome Comfort Windows

B.&C. M., Tisdale Windows installed July 18, 2006

“The new windows look great. We love the ease of operation. Can open and close them with ease, no rattling, good sound barrier, cooler in summer.”

Comments 5 years later: “What we like about our windows is they are always clear no frosting up or steaming up. They don’t rattle and they look nice too! It was a good investment, they seem to save us money in heating and electrical. We often had to have fans blowing on the windows to melt the ice and/or clear up the fog. They are energy saving. We are still very satisfied customers. We wish we would have had your company replace them sooner!”
