**Northhome Comfort Windows**

## T.&J. R., Preeceville Windows installed August 2, 2006 & July 16, 2008

"Our new windows are great! Excellent quality of the windows, they are airtight – no more cold drafts. Installation crew were wonderful. We were so impressed with their efficiency, professionalism, and friendliness. They left the house and yard tidier than they found it. We continued to highly recommend your company and product to anyone who mentions they need new windows."

Comments 5 years later: "What gives us the most satisfaction is the warmth factor. It's fantastic to stand in front of any of our windows when it's -40 C with gale force winds blowing and not feel even one bit of cold coming through. Most defiantly a good investment. Not only our windows exceptional quality, the crew that came to install them were highly skilled and efficient in their work. As well as friendly and courteous. We are still extremely satisfied customers."

Comments 10 years later: "We feel we made an excellent decision when we went with Northhome Comfort Windows for all our window replacements. The quality, workmanship & the fact that after 10 years you continue to care speaks volumes."
