Northhome Comfort Windows

A.&S. T., Regina Windows installed November 2013

"We purchased from Northhome because of the excellent service & the quality of the window itself. The best thing about our new windows is the quality of the installation. The sales agents were perfect. They were here for over an hour explaining everything from start to finish. Every other company we called just took measurements & left saying we'd get a quote a few days later. The office staff made every effort possible to keep us informed as to what was happening with our installation, so the communication was great. The installation crew was flawless. They took great care to protect our home, cleaned everything & made sure that I was happy with the entire install before leaving. The crew was extremely friendly & answered any questions I had during the install. It's tough to add anything to something that went so well. We will be replacing two more windows in the future & will be coming back to Northhome."
