Northhome Comfort Windows

A.&D. O., Canora Windows installed August 30, 2004

"The number one reason why we purchased from Northhome Comfort Windows is previous customer satisfaction. We never felt pressured into buying. Office kept in constant contact, never letting us "wonder" as to whether they were coming or not."

Comments 5 years later: "We are still very satisfied with our windows! Our house is cool in the summer and warm in the winter. The part we like the most is that during the daylight you can see out but you can't see in."

Comments 10 years later: "After 10 years the windows still look new. We would recommend your company to anyone who is looking to replace or install windows."
