Northhome Comfort Windows

V. T., Canora Windows installed July 18, 2006

“The two best things about our Northhome Comfort windows is the tinted glass and the vinyl, easy to keep clean. The installers were a very friendly bunch of guys. They placed blankets on the floor and even watched for my spruces, pines and rose bushes outside.”

Comments 5 years later: “I like the windows because no matter how cold it gets in the winter, they never freeze up. Also, the metal and vinyl clad is very good – no more painting around the windows. The workers did a good job, cleaned up well, pretty good.”
