Northhome Comfort Windows

B.&L. J., Churchbridge Windows installed April 27, 2011

Comments one year later: The best thing about my new windows is ... "The solid construction. Increased value of home, improved energy efficiency and better exterior appearance. Between energy savings and increased value of the house, the price is going to be easily recoverable. From sales interview to installation, your attention to detail and assurance that you support your product have been excellent."

Comments 5 Years Later: *"What we like most about the windows is the little, if any, maintenance. The windows look good through years of winters and summers. Our Northhome windows were absolutely a good investment. There was an immediate increase in the value of the house."*
