**Northhome Comfort Windows**

## A.&S. B., Drake Windows installed November 4, 1998

"Overall we have been very happy with our windows and the service we have received. We're very glad we went with the tinted, triple pane windows."

Comments 15 years later: "Best thing about our windows is that they keep the cold air out and the warm air in. After 15 years, the seals are still intact. We have just recently bought a brand new house that already had All Weather windows installed. Compared to Northhome Comfort Windows, the All Weather Windows are garbage. We have been very disappointed in All Weather Windows."
