Northhome Comfort Windows

W.&C. S., Lanigan Windows installed July 25, 2008

"Benefits of our new windows include lower energy costs, increased property value, excellent warranty and service, neat and clean appearance both inside and out and peace of mind. These windows were a very worthwhile investment for a superior product and professional installation. We really like keeping our dollars in Saskatchewan!! The most satisfaction is the confidence in knowing we have the best people in the window business serving our needs, from the very first contact and for many years to come. The Northhome team has set some impressive standards many others could learn from."

Comments 5 years later: "100% function satisfaction 12 months of the year. These windows are energy efficient, sound proof and have an appealing appearance. Five years later, we still feel this was a good investment."
