Northhome Comfort Windows

B.&B. P., Watrous Windows installed December 20, 2011 & June 6, 2014

Comments one year later: “The best thing about our new windows is there is no frost and they are warmer. We are very satisfied with the windows – they seem to be very good quality and installation. Installation day was great – friendly crew, clean up was great and much appreciated.”

On second installation: “The reason we purchased Northhome windows again was the fact that you install the windows and we were satisfied with our previous windows that you installed. The windows look great & don’t get frost in winter.”
