Northhome Comfort Windows

B.&L. O., Grayson Windows installed July 13, 2004

“Well worth the money. Saves on heating in winter and keeps heat out in summer. I like that the inside trim and gyproc was not disturbed.”

Comments 5 years later: “We still love our windows! In the summer our house is cooler and in the winter there is absolutely no frost on the inside. Northhome Comfort Windows are a good investment – we are very satisfied with our purchase.”

Comments 10 years later: “No matter how cold it is the windows stay clear. We feel that it was a great investment and will be a great selling feature for us.”
