Northhome Comfort Windows

V.&I. M., Naicam Windows installed April 14, 2011

"Quick, easy and fast installation. No reconstruction of window casings, wall or repainting. Also windows are of superior quality. The sales agent was very good. He explained everything in every day language. Explained the different options on windows. Not pushy. Keep up with the great job and superior product!"

Comments one year later: "The best thing about our new windows is they are easy to open, don't have to plastic them every fall and fight to get the tape off in the spring. Can open them all year round. Quality is the best. Installation was a breeze. Didn't have to repaint inside. No painting outside required. We are very satisfied with our windows. What has given us the most satisfaction is that our energy consumption is down and they are virtually maintenance free."

Comments Five Year Later: "What we like most about the windows is that they are easy to clean and low maintenance. Our Northhome windows were a very good investment. We are very satisfied with our windows and highly recommend Northhome to others."
