Northhome Comfort Windows

A. L., Yorkton Windows installed December 21, 2005

"The best thing about my windows is that they are maintenance free and energy saving. The outside vinyl trim is great with no more caulking and painting. I really like the tinted windows. Clean up was well done."

Comments 5 years later: "What gives me the most satisfaction about my windows is the carefree maintenance, just caulking in the fall, no painting! I wouldn't do anything differently, I am satisfied with the quality of the windows and the framework."

Comments Ten Years later: "The best thing about my Northhome windows is that metal trim on the outside and the vinyl around the windows means no painting required anymore. My windows were a good investment."
