Northhome Comfort Windows

A.T., Yorkton Windows installed March 20, 2014

"The installation crew came & everything was done in about 6 hours. The windows & their operation were explained & demonstrated. The job was done efficiently & the cleanup was good. I am happy with the windows. They operate well. I find the outside traffic & train noise is much reduced. They enhance the appearance of the house."

Comments 1 year later: "The benefits of my new windows are a better looking house, easier to clean, being able to remove screens for a better view, no drafts, a selling point at some future time & easy to operate. I am a very satisfied customer. It was a very convenient & quick way to have a major undertaking completed. I have had no problems & enjoy being able to open & close them easily. The sales interview was informative & I felt comfortable in asking questions & didn't feel pressured. The installation was done in a day & caused no inconvenience. The windows have continued to work well. I also appreciate all the instructions provided on how to operate them & keep them in good condition."
