**Northhome Comfort Windows**

## W.&G. S., Englefeld Windows installed January 13, 2006

“We would recommend these windows to anyone. No steam, no frost build-up, windows are always clear and draft free. As well as energy cost saving. We were impressed with the clean-up, compatible teamwork of the entire crew, and knowledge of their jobs.”

Comments 5 years later: “The windows don’t steam up in the winter or create a frozen line along the bottom of them. So far we are perfectly satisfied. At this point we have not required to use warranty.”

Comments 10 years later: “Best thing about the windows is that they do not steam up if they have proper air circulation.”
